

THE FUTURE IS HERE II

Exploring New Frontiers of Ocular Research

HANDS-ON WORKSHOP IN 3D- BIOPRINTING !

This session will delve into critical areas including needful collaborations in eye research, breakthroughs in cell and gene therapy, cutting-edge biomaterials, the role of the microbiome, and the identification of novel biomarkers. As we stand at the cusp of a new era in medical science, this meeting will serve as a beacon, guiding us through the complex interplay of innovative treatments, pioneering research, and clinical applications that are reshaping the field of ophthalmology.

EVENT HIGHLIGHTS:

-  Funding and Collaborations
-  Biomarkers and Microbiome
-  Cell and Gene Therapy
-  Biomaterials and Bioprinting
